Our Initial Aim Statement

What baseline data do we have relative to the goal for our educational system, and what does it tell us?

What (if anything) does research suggest can help people make progress toward the goal?

What does our own experience suggests can help people make progress toward the goal?

What do our “Five Whys" categories suggest can help people make progress toward the goal?

After discussing and writing down answers to these questions: What **questions** do we have that are “unknowns”? Write those on a half-sheet sized stickie note to share with the group, one question per note, and write BIG.
